

# LAURENT MEYER

## TECH LEAD MANAGER

Being a computer fanatic since my childhood, I started working for various companies at the age of 18. At 20, I cofounded my first company that we scaled to 7 digits revenue. I am looking for a new challenge in demanding environments to use my technical and management skills in order to make an impact.

## TECH SKILLS

- **Backend:** With 10 years of experience, I've proficiently crafted backend solutions for gaming, meteorology, and job boards, swiftly adapting to complex systems.
- **Frontend:** I feel confident in building any app in a reasonable timeframe from a simple prototype for a management demo to a fully fledged heavy duty web app (i.e. MeteoSwiss)
- **"Code Seal":** I swiftly adapt to various backend, frontend, and ops environments, treating programming languages as tools for efficient software development success.

## SOFT SKILLS

- **Leadership:** Transitioned from solo developer to esteemed team lead, focused on empowering team members and driving peak performance through "lead by example" leadership.
- **Project Management:** Over the years, I've honed my skills in managing increasingly complex projects. Starting with coordinating remote contractors for JobNinja, I have now progressed to successfully integrating AirConsole technology into millions of cars.
- **Scale:** My focus is always to build something bigger and better. At JobNinja, we started from scratch and scaled it to half a million monthly users! At Quatico, MeteoSwiss' brand new website gets millions of users per day. At AirConsole we're creating a whole new industry.

## EXPERIENCES

### TECH LEAD MANAGER

N-DREAM AG | MAI 2023 - PRESENT | ZURICH

- Directing a team of 5 engineers, managing day-to-day tasks and responsibilities.
- Skilled at resolving team standstills, I address complex tasks to sustain momentum
- Coordinate spec development with automotive and telecom sectors for seamless integration.
- Advocating for high-quality coding standards while gradually migrating legacy systems to modern technologies.

## SENIOR FULLSTACK ENGINEER

N-DREAM AG | NOVEMBER 2022 - MAI 2023 | ZURICH

- All-rounder committed to enhancing user experience by effectively troubleshooting and refining products across various platforms for optimal performance.
- Implementing CI/CD tools and fostered development processes, including peer reviews and pair programming, to elevate code quality.
- Promoted Agile methodologies and sprints to boost development team productivity and streamline project delivery.
- Undertook multiple technical explorations to decrease uncertainties and implementation time.

## SENIOR FULLSTACK ENGINEER

QUATICO AG | JULY 2021 - OCTOBER 2022 | ZURICH

- Built the new version of the website of our biggest customer (MeteoSwiss)
- Brought expertise mostly in frontend (React in TS).
- Applied software best practices (Outside-In TDD, Clean Code).
- Responsible for all frontend framework integrations (Maplibre, Highcharts) and led the team to the project delivery
- The project won Master of Swiss Web 2023

## COFOUNDER & CTO

JOBNINJA GMBH | MAY 2015 - JULY 2021 | MUNICH

- Founded the company, built the whole software, convinced 2 investors (including HR4YOU AG), scaled it to 7 digits revenue.
- Managed a team of 4 Software Developers.
- Active since July 2021 as a member of the board & technical advisor; I help the team to continue innovate and stay at the edge of the recruiting market.
